The Facilities Department has been busy the past two years. We've completed the Pittsburg High School Tennis Courts and Lighting Project and the Los Medanos Elementary School Portables Replacement Project. We've had Groundbreaking and Ribbon Cutting Ceremonies for each of these projects.

We had a Groundbreaking Ceremony for the PHS Softball Field Project in December 2022 and will be scheduling a Ribbon Cutting soon for this near-completed project. On September 20, 2023, there was a large turnout for the Groundbreaking Ceremony for the new Hillview Junior High School project.

FEATURED PROJECT

Hillview JHS Campus Replacement Project

The Hillview JHS Campus Replacement Project has been a long time in the making. The Hillview Site Committee has been meeting for a number of years preparing for this project and this day. Extensive design details were worked out to design a school that is specifically drawn for the needs of the Hillview community. The music and choir rooms are custom designed for the needs of the famous Hillview Band. Not only will Hillview have twenty-seven (27) new classrooms, six (6) new state-of-the-art science classrooms and two (2) special education classrooms, but also a new Library, new Admin. Offices, new Multi-Purpose Room and a new Gym and Locker Rooms. New campus exteriors will include a dining canopy, playground and courtyards. This will be a premier Junior High School Campus which will also serve as a community space for the Hillview neighborhood.

LOS MEDANOS ES NEW CLASSROOM BUILDING DEDICATION CEREMONY—DEC. 7, 2021

On December 7, 2022, the Facilities Department hosted a Building Dedication Ceremony at Los Medanos. All the students gathered to listen to various speakers regarding their new classroom building.

Built in record time and under budget, JL Construction went right to work to deliver this classroom building in the midst of the Pandemic and we are thrilled with the results. The Facilities Department was able to keep the cost under budget and had no increases to the Lease Leaseback GMP over the course of construction.

The new building consists of eighteen (18) new classrooms which includes five (5) kindergarten classrooms. Two (2) new playground structures were also a part of this project.
